

UTKU KÜÇÜK

PROFESSIONAL SUMMARY

I am a backend-focused software engineer with hands-on experience in developing Java and Spring Boot-based systems and APIs. I focus on building scalable, maintainable, and production-ready backend services. I have actively contributed to real-world projects involving authentication, data management, system integrations, and server-side processes, and I aim to further specialize in backend architectures and cloud technologies.

EDUCATION

ISTANBUL AYDIN UNIVERSITY

COMPUTER SCIENCE/ENGINEERING (ENGLISH),
BACHELOR'S DEGREE, 13.09.2022/11.10.2025

BAHÇEŞEHİR ÜNİVERSİTESİ

COMPUTER SCIENCE/ENGINEERING, BACHELOR'S DEGREE
(ENGLISH), 14.10.2020/14.09.2022

İSTANBUL AYDIN ÜNİVERSİTESİ

COMPUTER PROGRAMMING, ASSOCIATE DEGREE
04.09.2018/14.09.2020

PROFESSIONAL EXPERIENCE

NOVA UAV CLUB

SOFTWARE DEV | NOV 2024 - APR 2025

- Contributed to UAV-related image processing tasks.
- Implemented basic OpenCV-based scenarios such as frame processing, color segmentation, and simple object detection.
- Assisted in processing and validating camera data pipelines.
- Gained hands-on experience in engineering workflows, teamwork, and technical problem-solving.

BACKEND SOFTWARE ENGINEER

CONTACT

- +90 554 006 75 23
- muhammetutku@outlook.com
- Beylikdüzü/İstanbul
- linkedin.com/in/utku-kucuk
- utkukucuk.com
- github.com/mutkukucuk

SKILLS

BACKEND

- Java, Spring Boot (Backend Development)
- RESTful API Design & Security (JWT, RBAC)
- Node.js, Express.js
- JavaScript, TypeScript
- C#, C, C++, PHP

CLOUD & DEVOPS

- Docker, Docker Compose
- Linux
- Nginx (Reverse Proxy, SSL, routing)
- AWS (EC2, S3 - Giriş)
- CI/CD (Github Actions)

DATABASES

- PostgreSQL, MySQL
- MSSQL, SQLITE, MongoDB
- Offline-first (Realm)

DEVOPS & TOOLING

- Git & Github
- Postman
- FFmpeg

IOT & EMBEDDED SYSTEMS

- ESP32/ESP8266/Arduino
- MQTT
- Home Assistant Integrations

OTHER

- HTML, CSS, Bootstrap
- Basic OpenCV & Image Processing
- MATLAB (academic projects)

LANGUAGES

- **Turkish:** Native
- **English:** B1-B2

COVALENT COIN

REMOTE SOFTWARE DEV (PROJECT BASE) | MAR 2023 - AUG 2023

- Contributed to backend service development on a project basis.
- Assisted in designing and testing data flows between backend services and client applications.
- Implemented small-scale API endpoints and supported system integration efforts.
- Worked remotely with distributed teams in delivery-focused development cycles.

TEKNOLOJİK ÇÖZÜM

SOFTWARE SPECIALIST | AUG 2022 - FEB 2023

- Participated in the development, configuration, and deployment of backend services for corporate projects.
- Managed Linux-based server environments, including application setup, configuration, and maintenance.
- Containerized backend services using Docker and supported deployment workflows.
- Configured Nginx as a reverse proxy to securely expose backend services.
- Supported debugging, log analysis, and service reliability processes in production-like environments.

BİL HOLDING

SOFTWARE INTERN | OCT 2020 - JAN 2021

- Developed and maintained frontend components for corporate web projects.
- Built user interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Provided software support for small-scale mobile and Arduino-based projects.

KALE KALIP

SOFTWARE INTERN | MAR 2020 - MAY 2020

- Assisted in backend-oriented development tasks within corporate software projects.
- Supported implementation and testing of business logic modules.
- Took part in IoT-related projects involving device data processing.
- Gained practical experience working within a professional development team.

BOĞAZİÇİ DÖKÜMAN ÇÖZÜMLERİ A.Ş.

IT INTERN | JUL 2017 - OCT 2017

- Installed and configured multifunction printers (MFPs) for corporate clients.
- Assisted with basic network configurations, shared folders, and user access permissions.
- Supported hardware and software troubleshooting processes during field operations.

KALE HOLDİNG

IT INTERN | JUN 2016 - JUL 2016

- Installed and configured workstations, operating systems, and basic network settings.
- Supported daily IT operations related to corporate network and printing infrastructure.
- Assisted in maintenance, updates, and technical troubleshooting tasks.

P R O J E C T S

VIDUCATE - ONLINE EDUCATION PLATFORM

NOJE.JS, EXPRESS.JS, POSTGRESQL, DOCKER

- Developed backend services for a video-based online learning platform.
- Implemented JWT-based authentication and role-based authorization (Admin, Teacher, Student).
- Built infrastructure for large video uploads, processing, and streaming.
- Deployed the system on a Linux server using Docker and Nginx.
- Tech: Node.js, Express.js, PostgreSQL, Docker, Nginx

IRONECHO - SELF-HOSTED FITNESS PLATFORM

NODE.JS, EXPRESS.JS, MONGODB, DOCKER

- Developed backend services for a video-based online learning platform.
- Implemented JWT-based authentication and role-based authorization (Admin, Teacher, Student).
- Built infrastructure for large video uploads, processing, and streaming.
- Deployed the system on a Linux server using Docker and Nginx.
- Tech: Node.js, Express.js, PostgreSQL, Docker, Nginx

SMARTBLIND- IOT AUTOMATION SYSTEM

ESP32, ESPHOME, DOCKER, LINUX

- Built an ESP32-based smart blind automation system.
- Integrated hardware components with software logic and limit-switch handling.
- Implemented Home Assistant integration in a self-hosted environment.
